AQUAHEALTH, INCORPORATED LAUNCHES ITS EARTH-FRIENDLY “CLEARFILL 530” BOTTLED WATER PROGRAM **WWW.AQUAHEALTH.COM**

Today, AquaHealth Incorporated announced the nation-wide launch of its Earth-Friendly Clearfill 530. This sustainable bottled water program gives operators the ability to serve bottled water efficiently and cost-effectively, without the environmental costs associated with traditional bottled water. The two-valve design serves chilled sparkling and still premium water that is as pure as any bottled water currently on the market. The Clearfill 530 features portion-control technology to ensure labor efficiency.

AquaHealth Premium Water is the sustainable solution to traditional Bottled Water in [homes](#), [offices](#), [hotels](#), [restaurants](#), [schools](#), and any other place where bottled water is served.

Through innovation, technology and customer driven marketing, AquaHealth produces the best water and the healthiest flavored choices available.

In 1992, Founder’s Barclay Hansen and Steve Donaghy, set out to find a more sensible, sustainable and efficient way of delivering great water to restaurants in the Boston area. Today, AquaHealth has millions of loyal customers all over the United States.

AquaHealth is committed to providing a top quality product at an affordable price giving customers and food service providers a new choice for healthy beverages while helping protect the environment.
